SUBJECT: Quarterly Investment Report

For the first quarter of the 2022 fiscal year, the City's investment portfolio yield averaged 0.07%, which is below the average yield of our benchmark at 0.09% (see graph below). The variance equates to an additional earnings of approximately negative \$8,038. The total interest earned through December 2021 for all funds is \$15,165, which is only approximately 7% of the budget of \$220,000.

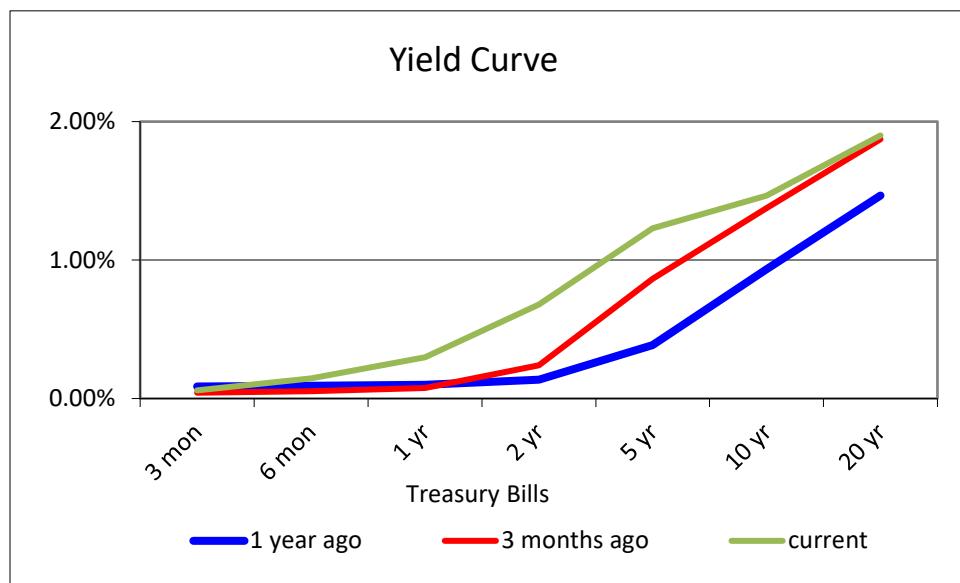

At December 31st, the City's portfolio totaled \$147,449,017 and consisted of 30% in Texpool, 10% in Agency Notes, 20% in Texas Class, 4% in TexSTAR and 36% in Logic. The majority of the investment portfolio remains invested in the pools. The majority of the City's portfolio remains in the pools due to revenue collections from IDA payments and property tax payments. Staff continues to purchase agency notes as new issues become available to continue to diversify the portfolio and begin rebuilding the investment ladder.

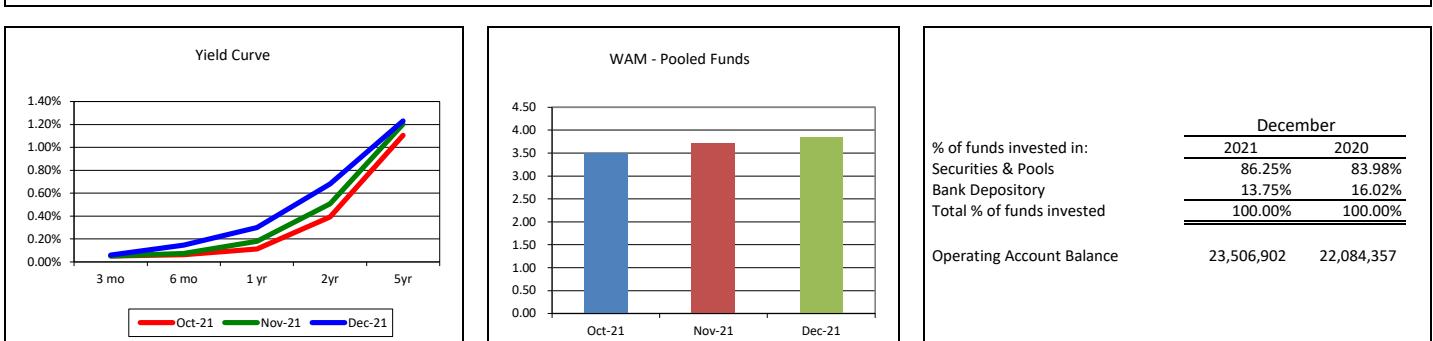

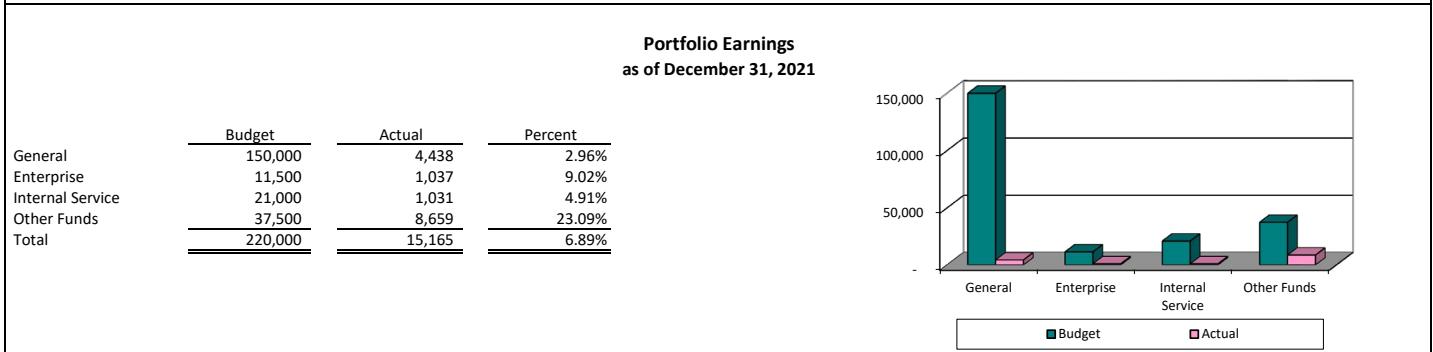

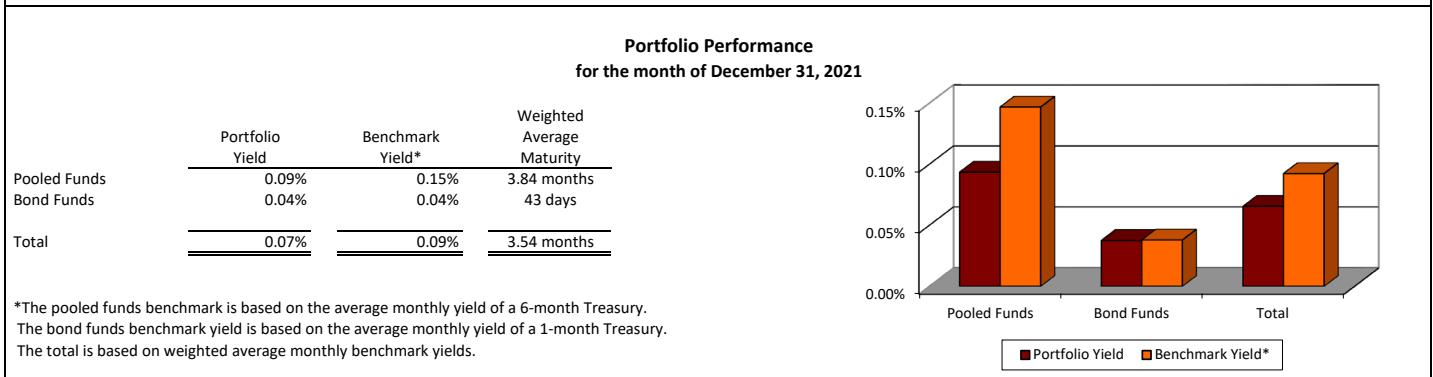

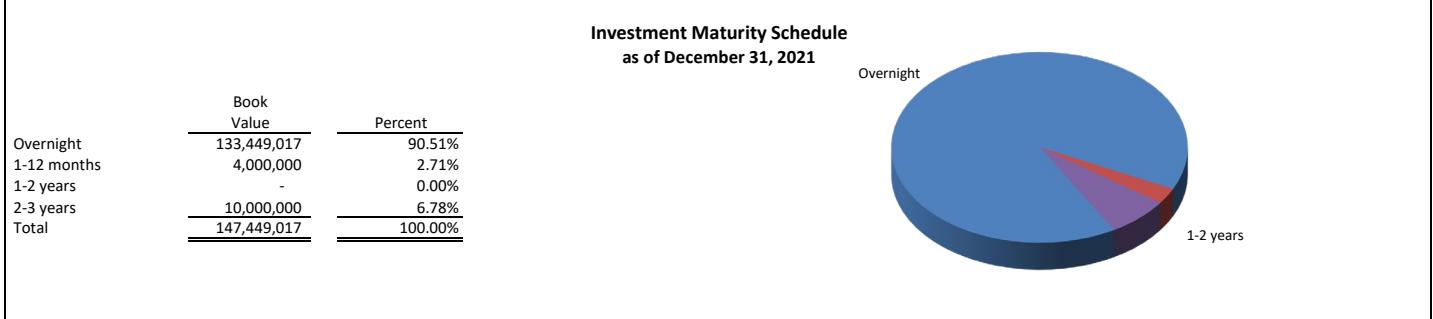

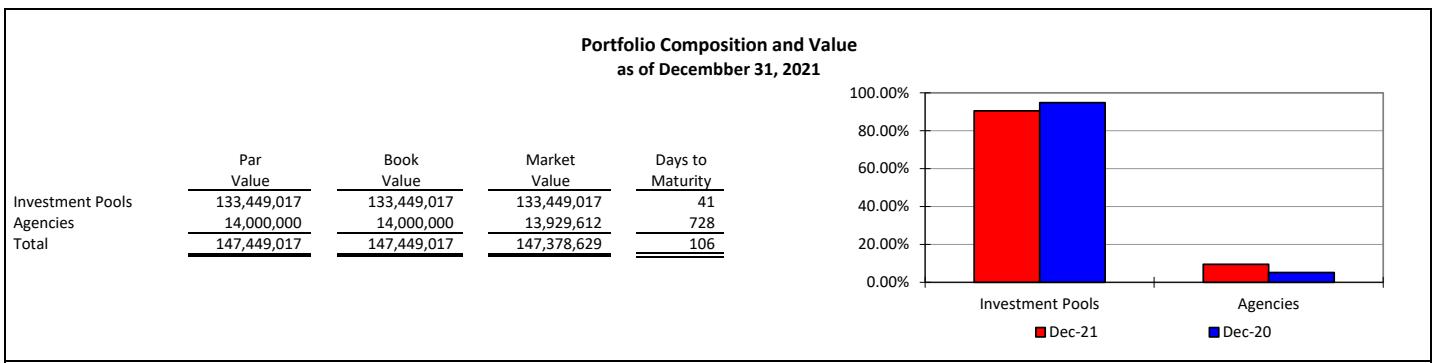

At the end of the first quarter, the City's portfolio consisted of 90% of the portfolio maturing overnight, 3% maturing 1-12 months, and 7% maturing in 2-3 years.

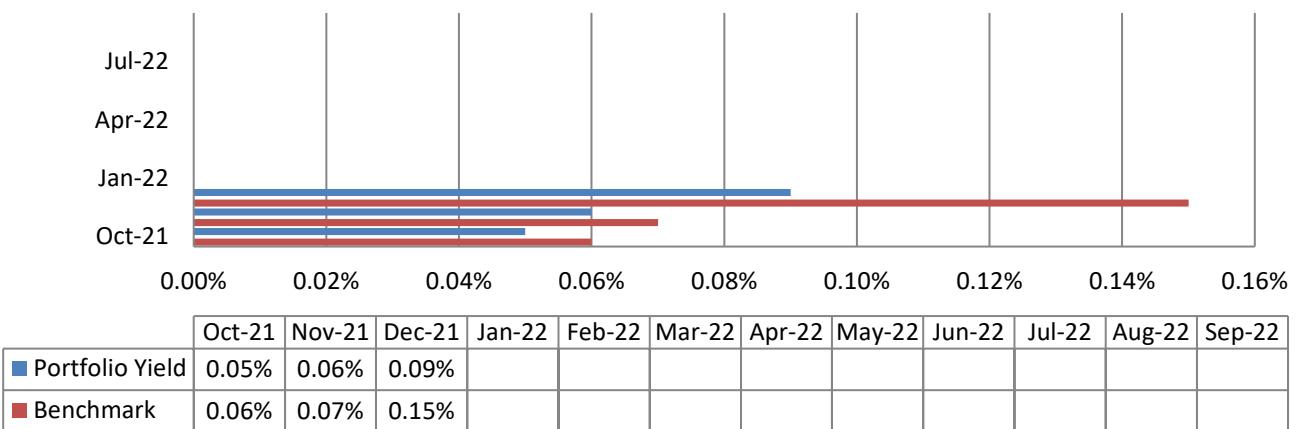

At the end of December, the 3-month T-Bill was at 0.06%; 2-year, at 0.68%; 5-year, at 1.23%; and, the 20-year was at 1.9%. As depicted on the graph below, rates have been relatively unchanged on the short end of the curve due to the unchanged overnight rate. An upward shift in rates has begun along the curve as the market is already pricing in the first rate hike.

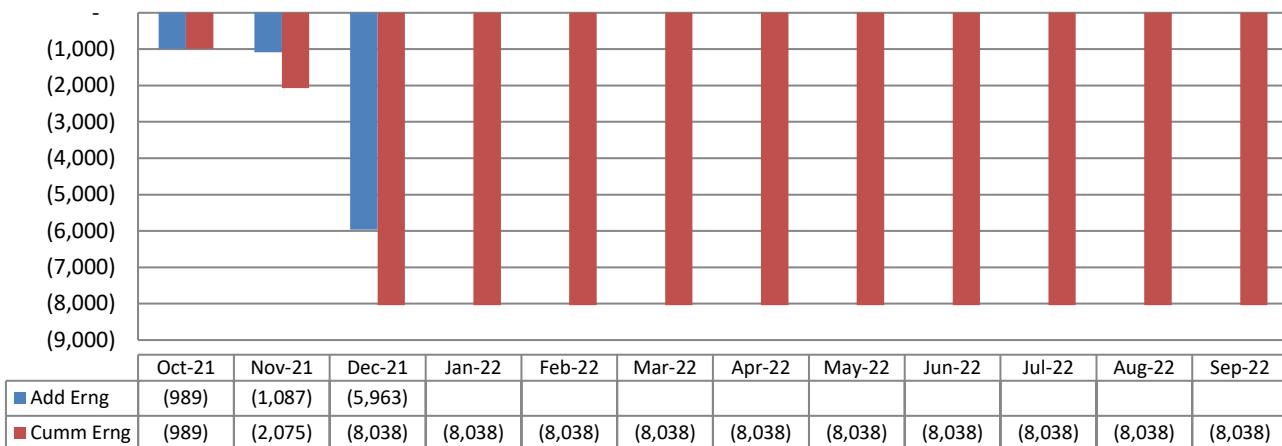

The Federal Open Market Committee maintained the federal funds target rate of 0.00%–0.25% at the January meeting. However, inflation continues to be a concern. Economic data is continuing to strengthen increasing the probability of multiple rate hikes of 25 basis points beginning as early as March. Staff continues to closely monitor economic conditions, and the strategy for the portfolio will, as always, focus on laddering to pick up yield along the curve and maintaining a constant cash flow and liquid position.
